ABOUT ME

I am an Informatics Engineering student at Gunadarma University with an interest in Web Development, with a focus on Backend Systems. I enjoy learning new things, working on various projects, and finding ways to improve the quality of each project I develop. I am also interested in continuously deepening my knowledge of Web Development and Software Engineering to grow as a Software Engineer and apply what I learn through academic and personal projects. My experiences through academic, personal, and organizational projects have helped me develop problem-solving, communication, teamwork, coordination, and responsibility skills. I am open to learning new things, collaborating with others, and gaining professional experience that will help me continue growing in the field of software development.
